Telework Exchange Offers Video Podcasts of Government Town Hall Meeting

*Apple and TANDBERG Partner with Telework Exchange to Demonstrate
Next-Generation Telework Technology in Action*

ALEXANDRIA, Va., November 13, 2006 – Telework ExchangeSM, a public-private partnership focused on eliminating telework gridlock, announced that sessions from the June 15th Town Hall Meeting are available as a Web podcast online at www.teleworkexchange.com. The programming showcases Federal government officials sharing their perspectives on telework programs and plans in their agencies. In addition, it highlights private industry leaders offering their knowledge on telework best practices and tools.

The June 15th Town Hall Meeting, the first in a series, focused on enabling public-private collaboration on Federal telework. Hosted at the Ronald Reagan Building and International Trade Center in Washington, D.C., the program attracted some 200 qualified leaders from government and industry. Visitors on the Telework Exchange Web site can download the conference programming free of charge and watch when convenient:

- Opening Session: Viewpoint – How to Expand Federal Telework: DOD Perspectives
- Telework Programs Underway – Agencies Start Their Engines
- Turbo Charge Your Telework Program – Best Practices and Available Tools

“Our goal is to empower dialogue and cross-pollination of best practices – to break the gridlock in telework,” said Stephen W.T. O’Keeffe, Executive Director, Telework Exchange. “Video and importantly on-demand narrowcast technology such as podcasting allows agencies to embrace new business and communicate models without breaking the bank. Internet television

channels afford a host of new opportunities for Federal government both within and beyond telework.”

TANDBERG, a leading global provider of visual communication products and services, captured the video and audio from the Town Hall Meeting via the TANDBERG video system and the TANDBERG Content Server (TCS). The meeting was then streamed via Apple’s video podcast making it widely available to anyone, anywhere at anytime. The TCS converts any video system into a broadcast studio for steaming and archiving meetings and presentations, allowing agencies to extend the reach of their message.

“Bringing interactive and on demand video into the homes and offices of teleworkers strengthens a teleworker’s ability to communicate,” said Joel Brunson, President, TANDBERG Federal. “The latest technology solutions allow teleworkers to interact with co-workers from anywhere – and still have a face-to-face conversation. We are excited to partner with Telework Exchange to highlight the advantages and opportunities for Federal workers.”

To download the podcast, as well as speaker presentations, please visit www.teleworkexchange.com/townhallmeeting.

About Telework Exchange, LLC

Telework Exchange is a public-private partnership focused on demonstrating the tangible value of telework and serving the emerging educational and communication requirements of the Federal teleworker community.
